

Errata for the SOLUTIONS MANUAL for the textbook “Probability and Statistics – The Science of Uncertainty”, Second Edition, by M.J. Evans and J.S. Rosenthal. As of Fall 2025.

(These errata will be corrected in the online version later.)

- Problem 1.6.6: The first “ $(0, 1/2)$ ” should be “ $(0, 1/2]$ ”
- Exercise 1.5.12: The second sum should start at $d = 2$, not $d = 1$.

And for the BOOK ITSELF:

- Page 31, exercise 1.6.6(a): “for all $n = 1, 2, 3, \dots$ ” should be “for all sufficiently large n ” or “for all $n = 2, 3, 4, \dots$ ”.
- Page 50, exercise 2.3.20: Specify that the values of X each time the loop is executed are “independent”.
